Aromeo App Stage 1 Requirements

1.Key functions

Sorted by priority:

1. Home Page Part

2. Modules Part

3. Aromeo Alpha Connection Part

4. Aromeo Alpha Settings Part

5. User Profile Part

6. Signup & Login Part

2.Platforms

IOS & Android

*Currently, we don't require Aromeo App be compatible with ios/android dark theme.

3.Current App

The work scope of stage 1 is similar to our current app, you can check our current app for reference if you want.

App Demo Video:
https://drive.google.com/drive/folders/1PevIouq73nTIgZD1BjA04Vc0XS4KALna?usp=sharing (As signup/login part is buggy, we didn't show it here)

If you want to try our current app in person, please provide your apple ID, we can invite you to try our app via Testflight.

4.UX Documents

Please check the following documents to see how each function works, it includes the page logic, and some detailed requirements for each page.

1. **Home Page & Modules Part & Aromeo Alpha Connection Part** :
   https://5c5rzm.axshare.com

2. **User Profile Part:**

   https://69knsx.axshare.com

3. **Signup & Login Part:**

   https://rrxrwh.axshare.com

4. **Page transition effect requirements:**
   https://docs.google.com/presentation/d/1Mn1hlj9FLsOJ4a4MJvCX-QtpFYr4MPwdrIZhV2yxoPQ/edit?usp=sharing

Note: Click the menu button on top left to check all pages after opening the ux document powered by Axure. Sometimes it takes time to load the full page, pleas wait for some time.

5.UI Design

Note: For all copywriting, please follow the UI design.

We've uploaded UI design to **Zeplin**, you can check the screen design here.
https://scene.zeplin.io/project/5e294dd728cb3a94f5c74e49

For design assets and more information, please provide your **email address** so that we can invite you to our Zeplin project.

Please take notes of the points below when working with Zeplin:

- Always download assets in the Styleguide → Components page when there it is set.

- Check the components' properties at the right column. Click the parts in the component to check each of them. You may find some components having properties like shadow, background blur, opacity, gradient etc.

- If some parts of the asset don't match with what is shown on the screen in Dashboard, replace the parts following what is shown on the screen page. E.g. The color is different in components and in screen, so just download the component and change the color shown on the screen page. The reason of this situation is that some components we use it in a lot of screens, so there are many different variations. We cannot generate every variation to the component part because there are too many.

6.Built-in Footages and Sounds

You can find the **four built-in footages, sounds and preview images** here.

Note: We provided both original size footages (usually in landscape) and cropped footages (in portrait), please feel free to tell us if you have specific requirements on the footages.

1. Home page

https://drive.google.com/open?id=1zvJedv5uWagU6xJvpLsxBllDJTtwTc-C

2. Focus Module Theme A

https://drive.google.com/open?id=1MjTkonRkNLKnxu64jxVjZMNc7UqgE78X

3. Relax Module Theme A

https://drive.google.com/drive/folders/1pBL1bsinCF9T17g9-hy4ZnsKy5TdMty3?usp=sharing

4. Sleep Module Theme A

https://drive.google.com/drive/folders/1Sb_M-RaP6Q4ZREHLE7vfciEyCncF3bMn?usp=sharing

7.Backend

For backend part, one of our colleagues will be responsible for it and work with you guys. Please tell us if you have specific requirements on it.

8.Questions

We have added some notes on the screens, please check those notes in magenta to have a better understanding of our questions.

1. Please note that we applied a Background Blur layer (with saturation adjustment) and an Exclusion layer effect above of the preview image in module screens. Please let us know if we can achieve this effect.

2. We want to achieve that the icon background on module pages can depend on the footage, in this stage we have the Relax module in dark theme icons and the others in light theme icons. Can we make buttons responsive to the background footage automatically?

3. Would you like us to provide with the Sketch file too? Because in Zeplin maybe it's harder to check the layers and effects. If you can work with Sketch, we can share it with you.

9.Estimated Work Time

We're going to know the estimated time cost for each part.

Sorted by Priority

Aa Function	☰ Estimated Time Cost	🗒 Deadline
Home Page		
Modules Part without device		
Aromeo Alpha Connection Part		
Modules Part with device connected		
Aromeo Alpha Setting Part		
User Profile Part		
Login/Signup Part
